

RECYCLE
100

8th International Secondary Lead & Battery Recycling Conference

SIEM REAP 2023

Monday 4 & Tuesday 5 September 2023
Sofitel Angkor Phokeethra Golf & Spa Resort

We collect, we break, we recover!

The only conference dedicated to the world of recycling and recovery of lead-acid, lithium-ion and other battery chemistries.

The conference will hear from leading international speakers on the latest recycling & smelting methods, breakthrough research and health, safety and environmental topics. Whether it be a lead-acid or lithium battery, we still have to collect, break, recover the valuable elements and dispose of the waste in an environmentally safe manner protecting all workers.

TWO DAY'S OF INSIGHTS

An exclusive opportunity to look at the recycling and recovery of lead-acid batteries and other battery chemistries, including lithium-ion.

VENUE

Join us at Sofitel Angkor Phokeethra Golf & Spa Resort; Siem Reaps leading conference resort.

EXHIBITION

Meet with customers and partners to conduct business, network, and find new ways to stay ahead of the competition.
